<b>Kind of Employment:</b>	Full-time
<b>Qualification:</b>	Creativity, analytical thinking, teamplayer, strong communicative skills, independent worker, self confident behaviour, strong organisational skills, solution oriented, initiative of one's own, flexibility, commanding knowledge of MS software
<b>Career Level:</b>	With job experience

### **Detailed description:**

Core-Competence GmbH is a young and dynamic company in Munich which makes and implements high-quality web-based learning adventures for large corporations. In this new business segment, sometimes called "game-based learning," we are currently the industry leader and want to expand our position in a rapidly growing market.

We are looking for an assistant who can help us in our national and international projects in the areas of design, scriptwriting, content, project management, etc.

This creative and demanding task entails a great deal of responsibility and emotional involvement.

An interest in "Learning & Gaming" and "eLearning" would be an advantage.

Discipline and a capacity for structured work are essential preconditions.

Additional preconditions are a very good knowledge of the English language and the professional use of PC and the Web.

We value an open and communicative attitude toward customers and co-workers.

We place particular importance on a "hands-on" mentality and a great deal of common sense.

This is an unusually interesting and varied job in a young and dynamic company.

You can fully contribute all your specific personal strengths and grow as you deal with new challenges.

Please send your appropriately documented application and an estimate of the salary you have in mind to:
